ACADEMICS

WE MEET OUR CHALLENGE

Mary Frey and Barbara Sagerhorn admire a Shakesporean Theater made by George Vincent.

English

English is now taught on three levels: advanced, average, and below average. The advanced class is for students who are planning to go on to college. In the average class some students are planning on going to college and others are not; the below average class is for students who are not planning on going to college or who lack the fundamentals necessary to compete in regular classes.

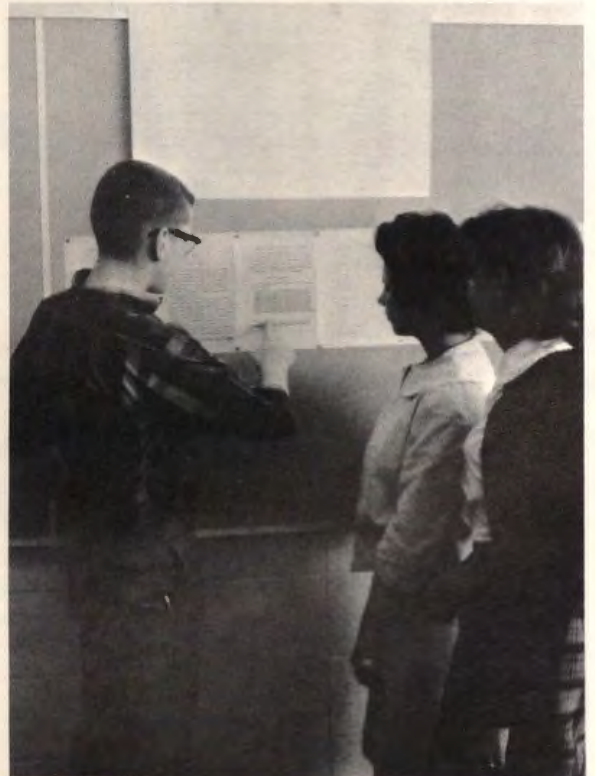

English I stresses sentence structure and vocabulary. The student is introduced to short stories, short poetry, a selection from the *Odyssey*, a Shakesporean play, and a novel by Charles Dickens.

English II continues to emphasize literature: short stories, poetry, essays, biographies, autobiographies, drama, the literary epic, and the novel. The student also does frequent theme writing, speech projects, and a library research unit.

Paul Miller explains how footnotes are made to Reva Norwood and Sharon Stephan.

English III is a study of the themes, styles, and thoughts of American writers from colonial to modern times. The course emphasizes longer themes, and the student is required to write a complete research paper based upon some aspect of American literature. The course also includes a study of grammar and vocabulary.

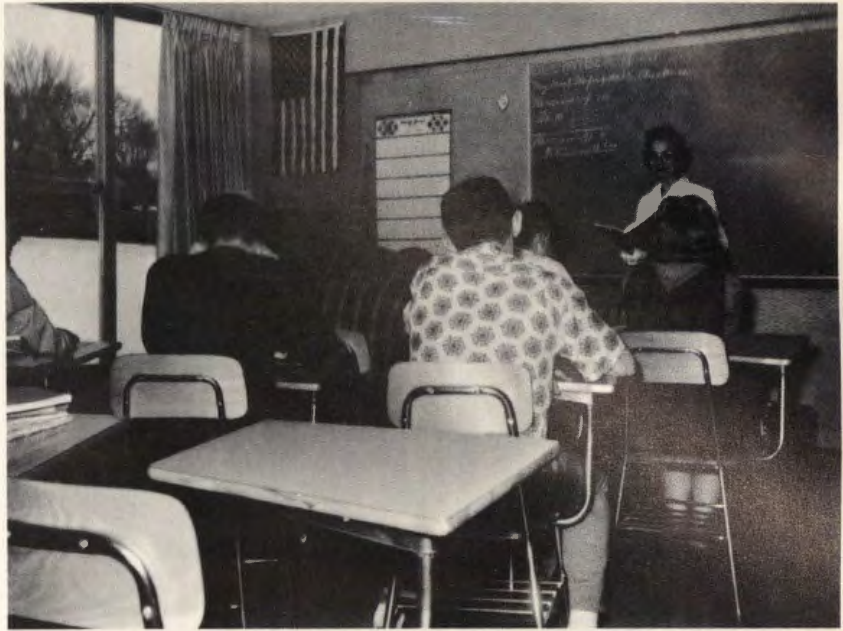

English IV is a survey of the literature of Great Britain, beginning with the Anglo-Saxon literature and chronologically covering major writers and trends through the centuries to modern times. It includes a thorough review of grammar, elementary semantics, special types of writing particular for college success, stressing theme writing, and a research paper based upon reading in English literature.

IN THE CLASSROOMS

A new course, English-Reading, has been offered this year by the W.C.C.H.S. English Department.

English-Reading, which carries English credit, offers instruction in basic reading skills to students who find their progress in all school work impeded by the lack of these skills. Classes are small so that students may be given instruction on an individual basis.

Mrs. Du Molin's Reading Class

Public Speaking

Speech is a one semester course in which the student learns the method of constructing a speech. He has experience in doing research, outlining, organizing material, and making notes. Many opportunities are provided for the student to speak so that he can gain self-confidence and poise before an audience.

Advanced speech is offered the second semester. Emphasis is placed on the advanced problems of public speaking. Special areas of speech covered are parliamentary procedure, debate, oral interpretation of literature, and dramatics.

Debate in Public Speaking

BY LEARNING OUR STUDIES

American History

American history is a study of the history of the United States from 1492 to the present. Details are studied and much attention is given to the consideration of the background for current problems.

A thorough study is made of the Declaration of Independence, the Constitution of the United States, and the Flag Code in order to prepare students for the examinations which the state law requires.

World History

World history is a study of how people have struggled against nature and other groups of people in an attempt to find a more satisfying way of life. The course is taught in chronological order; the adventures of mankind are studied as a continuous story from the time man lived in caves or crude shelters up to the present age when man has organized himself into powerful, modern nations. Special attention is given to the contributions of various civilizations of the past to our way of life today and to the problems of today's world. An attempt is made to relate the past to the present by observing how many of today's problems have originated in both the immediate and distant past.

TO PREPARE US

Social Studies

In social studies the student is introduced to map reading, and throughout the year the fundamental social studies skills are taught. The student learns the geography of the world and the interrelationship of his community and the world.

American Government

American government consists of a study of Civics and Economics, dealing with the theory of democracy, the form and structure of government, the way it functions, and the role each citizen plays in it. The course includes the study of the nature and problems of economics, use of personal income, production and business organization, and the marketing of goods. Although the major emphasis is placed on the Federal government and the capitalistic system, a survey is made of State government and the Australian ballot, as is required by State Law.

FOR OUR

Chemistry reveals the composition of materials and the changes in composition which those materials undergo. It also deals with fundamental chemical theory and the understanding of, and drill in, the gas laws and chemical equations and problems. Work in the Laboratory accompanies the class work.

Earth science is designed to give students a better understanding of the world in which they live. It deals with geomorphology, a study of land and forms; oceanography, a study of bodies of water; astronomy, a study of the earth in space; and meteorology and climatology, sciences of the atmosphere and climate.

Biology is the study of plant life, animal life, and the life of human beings. The study of plant and animal groups shows the inter-relationship of all living things, the development of life through various stages of complexity, and the wide variety of organisms which compose our living world. Emphasis is placed upon structure, function, behavior, and adaptations of living things. Physiology of the human body is also given considerable stress.

Physics consists of an analytic investigation of the basic properties of heat, light, sound, mechanics, electricity, and atomic and nuclear physics. The first semester is a qualitative view of heat, light, sound, and electricity. In the second semester the quantitative aspect is emphasized.

Physical science, an advanced general course in science, is designed to familiarize the student with the physical laws and forces of the universe. It covers physics, chemistry, geology, astronomy, and atomic energy in a general way, with classroom demonstrations taking the place of laboratory work.

FUTURE YEARS

Math I-A

The procedures and concepts learned in earlier grades are reviewed with emphasis upon structure of the number system and elementary algebra.

Math I

Although beginning algebra emphasizes a development of manipulative skills with equations in the system of real numbers, it is also a study of mathematical structure.

Math II

This course is a treatment of the nature of deductive reasoning and its applications to Euclidean plane geometry. Spatial concepts and analytic geometry are included, along with elements of spherical geometry.

Math III

This is a continuation of Math I, with more advanced equations and algebraic processes. It includes logarithms, vectors, and trigonometry, and continues analytic geometry.

Mr. Murphy's Math II Class

Mr. Murphy's Math IV Class

Math IV

Math IV begins with an introduction to logic and an exploration of the number system and its fundamental operations, including a treatment of systems other than the system of real numbers. It emphasizes functions and their graphical representations, continuing analytic geometry and trigonometry. The final work with limits leads to an introduction to polynomial calculus.

Math V

The first semester deals with solutions of higher equations and general properties of equations, including geometric and algebraic limits, sequences, series, and a continuation of trigonometry and vectors. During the second semester, probability and statistics are treated as a contrast to deductive reasoning, in their applications to games and other elements of chance in our lives.

IN THE

Taking a timing'

Beginning typewriting is a one-semester course devoted to the development of proper techniques in the operation of the typewriter, keyboard mastering, simple business letters, centering, and tabulation.

Advanced typewriting is a two-semester course with continued emphasis upon typing techniques and with practice on business letters and forms, tabulations, rough drafts, and manuscripts.

Bookkeeping has a two-fold purpose: that of vocational training and for personal use. The principles of double-entry bookkeeping are taught, including several practice sets covering the complete bookkeeping cycle. Personal bookkeeping training includes the study of banking services, social security, and the essentials of income tax problems.

BUSINESS WORLD

Office Machines

Office machines is a one-semester course designed for those students not enrolled in Shorthand II but who are interested in learning business techniques on adding, calculating, transcribing, and duplicating machines.

Office Machines

General Business

General business is a one-semester course which includes consumer banking services, use of credit, consumer spending, insurance, record-keeping procedures, and job opportunities for the beginner in business.

Business Law

Business law is a one-semester introductory survey of the laws of business, dealing with the nature and classification of law, contracts, negotiable instruments, wills, property, partnerships, corporations, and legal procedures.

Shorthand

Shorthand

Shorthand I is a thorough study of the principles of Gregg shorthand. The emphasis is on the development of basic shorthand vocabulary through reading and writing practice.

Shorthand II consists of further speed building and vocabulary development in shorthand. Instruction is also given in transcription of shorthand notes on the typewriter into mailable letter form. The second semester consists of secretarial practice and office machines, including; adding, calculating, transcribing, and duplicating machines.

IN COLLEGE

Spanish I emphasizes the reading, writing, and speaking of elementary Spanish through the application of basic idioms and everyday vocabulary. A study of Mexico provides examples of Spanish customs and literature.

Spanish II stresses intermediate conversation, pronunciation, and grammar structure. History of Latin American countries and a study of their people and customs is included.

Latin I deals with beginning Latin — emphasizing reading and writing, with attention given to vocabulary, mythology, word derivation, and Roman life.

Although Latin II includes continuation of grammatical construction and vocabulary, it emphasizes writing in Latin and reading Roman epics and history. Caesar's life is studied, along with his "Commentary on the Gallic Wars."

In Latin III, emphasis is placed on reading such authors as Caesar, Pliny, Petronius, Seneca, and Ovid. Special attention is given to Cicero and the city of Rome during his lifetime.

In Art I the student will investigate the basic materials, methods, and principles of art as they apply to art appreciation and his personal creativity with both two and three dimensional work.

In Art II the student gains an understanding and appreciation of art through the ages by study and work in the major media of certain periods.

Art III is a special course where student and teacher work out his problems by advanced individual projects.

OR — IN FAMILY LIFE

Home Economics

"The World is a Cave . . . Love is a Word . . . Man is a limited slob, not a free one." These are some of the many things Saroyan has to say in his play "The Cave Dwellers."

The people are a strange family of failures and sentimentalists. They have nothing but each other and the old abandoned theatre they live in, and the theatre is going to be destroyed. It is a picture of the cave every man lives in — his body, his familiar surroundings — and his bewilderment when he is freed from it.

The forgotten clown who heads the family is called "King" — and only a King would hope to regain a lost empire from a world of despair. His kingdom was the stage and his audience, his subjects.

The Queen is a softer person, still dreaming of the days when she was a leading actress, but now is centering her life in her family and the problems of keeping the main characters together.

The Duke is a younger man who has given up on life. His days as a champion prize-fighter have passed, and now he is a very shaken, simple-hearted man who fails even as a beggar.

Last in this assortment of personalities is the Girl, who is young, naive, and eager for life. She adds youthfulness to the story as she finds love for the first time.

The Cave Dwellers leave their major question unanswered: Is life worth living? The answer is up to you.

CHALLENGE

The Challenge staff met for the first time in the spring of '61 to begin next year's book. After editors were chosen, we were ready to start work on what we hoped to be WE-GO's best yearbook yet.

Things became hectic right after Christmas vacation as we tried to meet past-due deadlines and agree on small and large problems alike. It became necessary to spend more time on the larger sections, and many staff members came in evenings to accomplish this.

After various discussions, much compromising, and a lot of work, we were ready to present WE-GO students with our yearbook for 1962.

International Honoray Society for High School Journalists

In September the Centurion, our school newspaper, achieved a new honor. The paper received a certificate from the Student Press Association, recognizing it as one of the five best high school papers in the nation, in the realm of editorials. Highly pleased with this honor, the staff tried again this year to maintain the same fine editorial writing. Under the direction of Mr. Morrison, the advisor, the editors clearly defined their editorial policy and have tried to include articles on nationally known people and world-wide affairs, community problems, and high school problems such as loyalty and stealing. Generally all editorials were good.

Feature is important to any newspaper. The Centurion had varied features ranging from a look into Challenge activities to reviews of plays and the musicals to fashion forecasts. There were light features that made high schoolers laugh and brought entertainment to them, and features that helped us learn about ourselves.

STUDENT COUNCIL

Student Council Officers

Our busy Student Council started out the year coordinating all homecoming events. The rest of the year has been filled with conventions, special projects,* and elections.

At the fall convention the West Chicago delegation invited the Big 8 — Little 7 Association of Student Councils to hold their spring meeting here. Our Council started planning right away, but actual committees were not formed until late this winter. As April 7th drew nearer, things got a bit hectic, but all the work did get done on time and the convention was successful and a tribute to We-Go.

The Council worked on many other projects throughout the year; perhaps the most important one was the foreign student project which was finally ready for presentation to a committee of adults in the community; the final steps are now up to them.

The year has been a full one — sometimes hurried, most often fruitful, and always busy.

NATIONAL HONOR SOCIETY

Left to right: Sponsor, Mr. Ream, Bonnie Roberts, Rae Ann Hitzmann, Mary Margaret Miller, Estelle Ast, Secretary-Treasurer, Elizabeth Goodwin, Joy Meriam, President, Richard Jahns, Keith Sponholtz, Vice-President, Patrick Alden, Fred Johnson, Paul Miller, Michael Wehmen, Patricia Carey, Marsho Sauber, Andrea Tinnes.

Scholarship, leadership, character, and service — these are the aims and ideals of National Honor Society.

This year's organization began its busy year by speaking to freshman homerooms about scholastic aims and study habits. Besides its regular informal meetings, N.H.S. presented an entertaining and informative assembly program on the subject of academic honesty. The highlight of the N.H.S. year was the beautiful initiation ceremony held to honor all those who had achieved the four aims of the society.

An abstract graphic design featuring several thick black lines and triangles. The last few years the West Chicago football teams have had a few tough seasons, but this year the team went from last place in the conference to third.

After being overpowered at Naperville, the boys played heads up football. The team gave Sycamore their toughest and closest game since 1957, losing by only one point. After beating St. Charles and Mooseheart the team went on to their greatest victory, the one over Geneva. This win gave us the third place in the conference. The ball used in this game was signed by the players and put in the trophy case.

The co-captains this year were Dick Jahns and John McKenzie. The team voted Fred Johnson the most valuable player award. The captains elect for the 1962 season are Bill Syorc and Tim Seeley.

With the return of 13 lettermen next season the hopes are high for even a better season.

Although the Freshman squad did not have a winning season, Coach Price was often pleased with the team. The defense, especially, shone several times, particularly in a game with Kaneland. This game, a scoreless defensive battle, held promise for future We-Go teams.

Varsity Basketball

Our team had the best won-lost record of any team in the school's history with 17 wins and 7 losses, and the best conference record of any West Chicago basketball team by finishing second with 11 wins and 3 defeats.

When the Little Seven coaches voted on the All-Conference teams, they elected Keith Sponholtz to the first team and Tim Seeley to the second team.

Keith Sponholtz, 6'8", was the team's leading scorer and rebounder for the season. He closed out his 3 year varsity career by scoring a total of 378 points as a senior, and had a 3 year total of 869 points.

Tim Seeley, a junior and second high scorer, won the team free throw trophy by converting 78% of his charity tosses. Harold Giese, the team playmaker, was close behind with a percentage of 74.

Tom Weigand will be remembered for his fine defensive play and for his 30 foot basket which came with one second on the clock and gave We-Go a 60-58 win over Geneva.

6'5" Bob Price and 6'3" Bob Owens alternated at their position and both contributed to the success of the Wildcat team.

SAY WILDCATS

Say, Wildcats, sh-sh
 We know just what to do, sh-sh
 To get a win from you, sh-sh.
 You've gotta stay in training, stop that smoking,
 Practice when it's raining, don't mean loafing,
 No huggin' and kissin' with the girls,
 You gotta stay out of that social whirl.
 Now don't forget your grades,
 You gotta have at least an "A."
 OOOOOOEEEEEE. This training's really killin' me,
 Home in bed each night by eight,
 Cause Coach says don't stay out late
 So if ya' wanna earn a letter (clap, clap)
 Have a girl wear your sweater (clap, clap)
 Just get this straight, OOOOOOEEEEEE
 Can't celebrate, No sirree
 And if you've got hair on your chest (ugh, ugh)
 You're a wildcat, (Huh, ch-ch)
 Oh Yes!

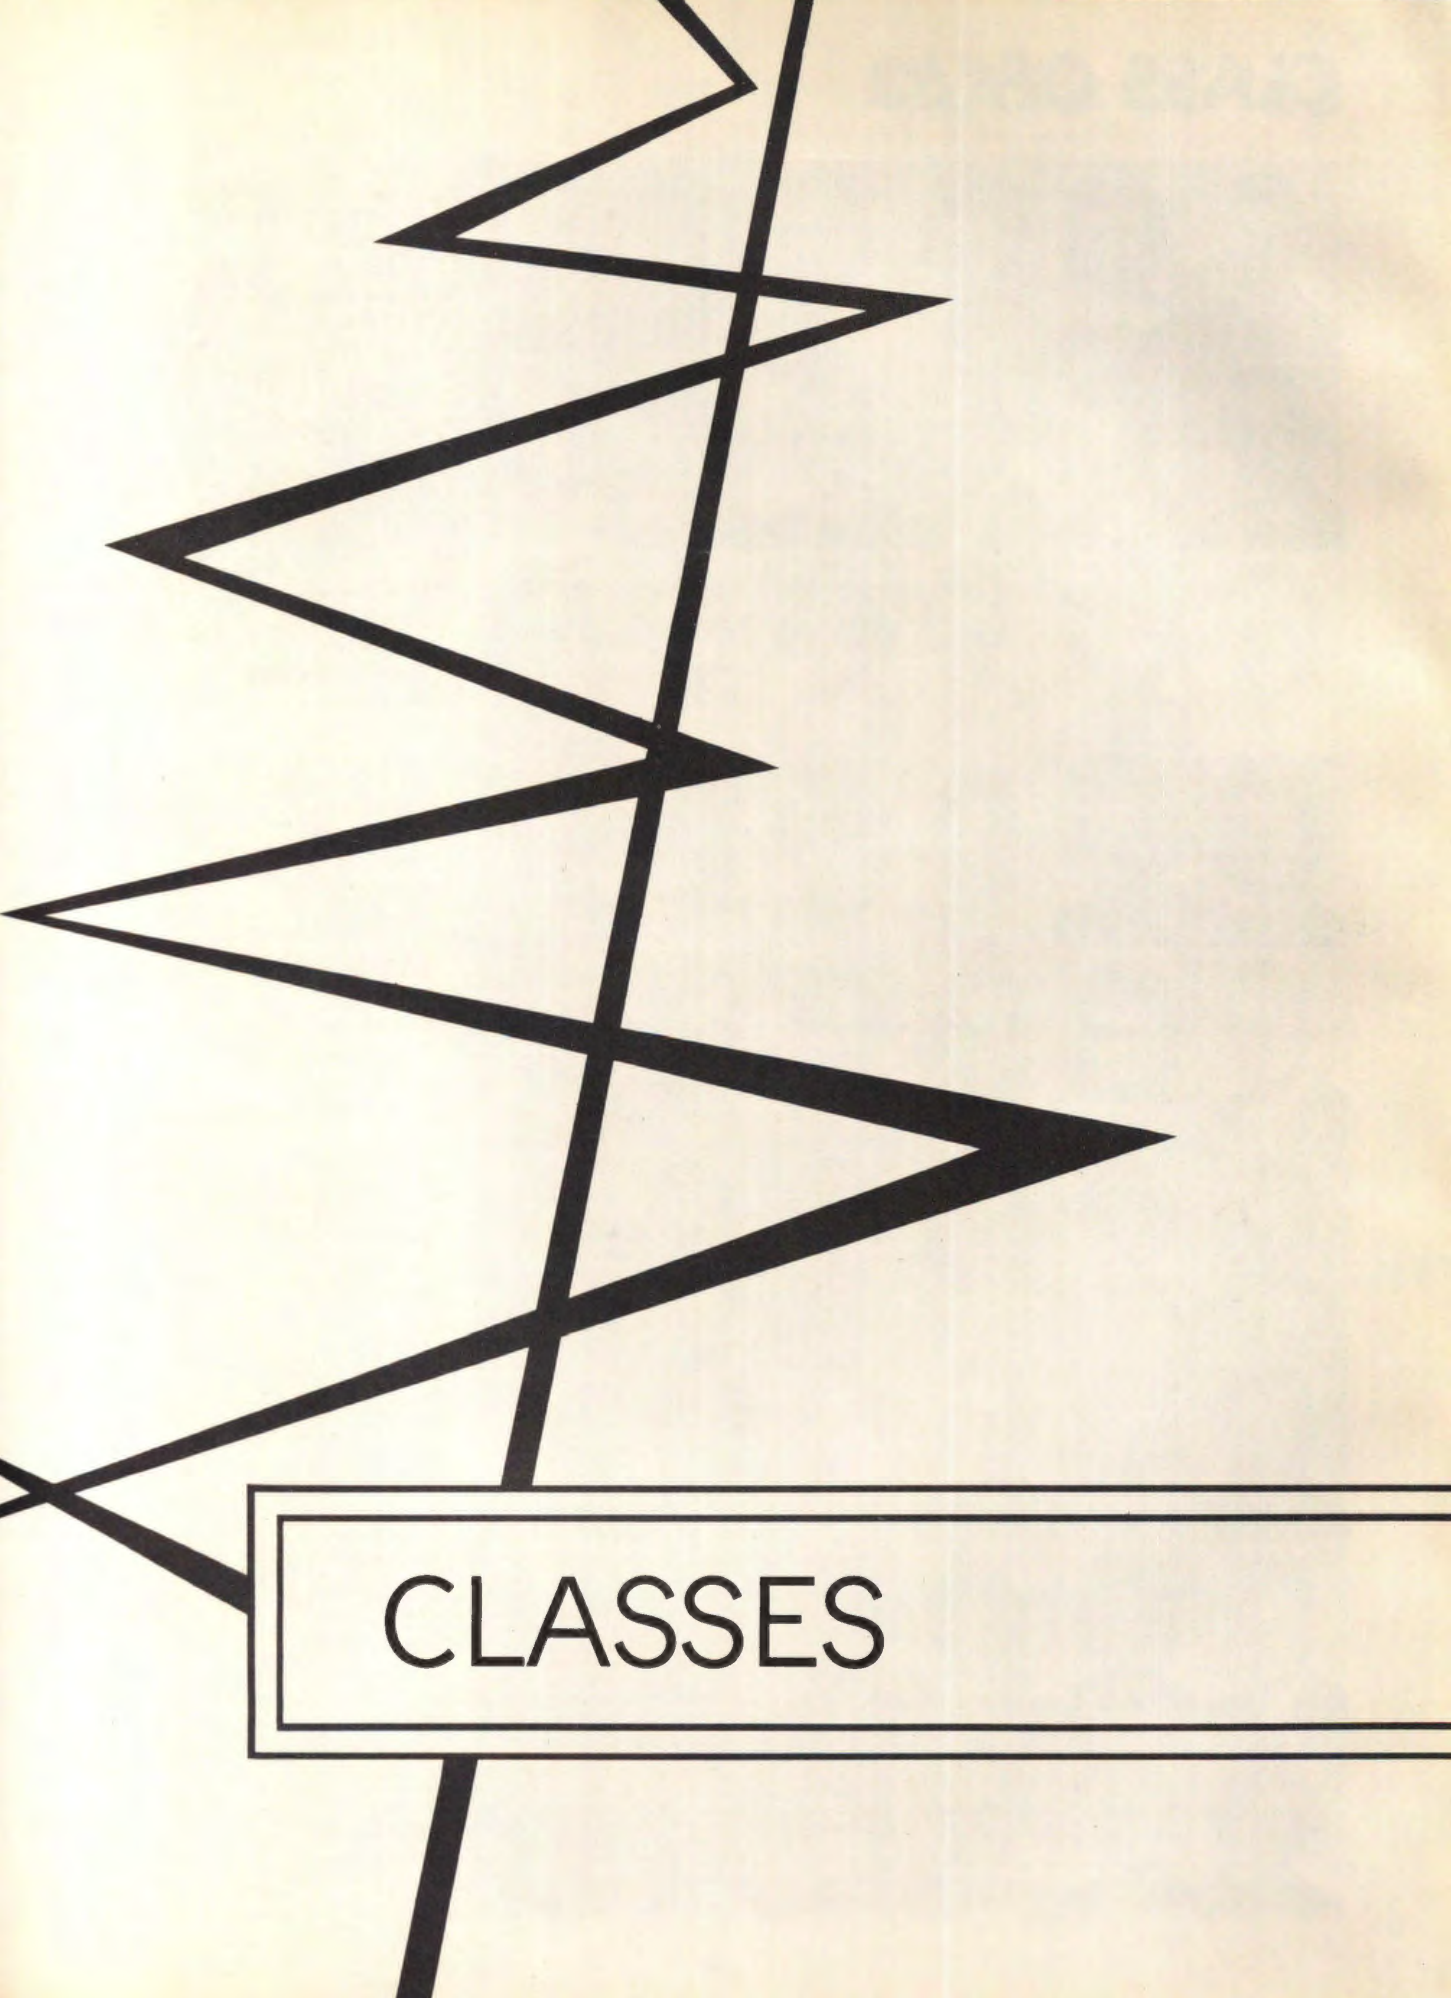

HILLBILLY CHEER

Well, Geneva's got a team,
 And a mighty fine team,
 And to beat that team,
 Everybody's gotta scream:
 Eeeaaahhh — Wait!
 Be calm, be cool, and beeee collected.

Well, Geneva is rough
 And they say they're tough
 They can beat everybody
 But they can't beat us.
 Eeeeeaaahhh — Wait!
 Be calm, be cool, and beeee collected.

Well, we don't care
 What the people might say
 'Cause we can beat Geneva
 Just any old day.
 Eeeeeaaahhh — Wait!
 Be calm, be cool, and beeee collected.
 Hey you all, be cool!

CLASS OF '64

Sophomore Officers: George Lockwood — President; Bob Mayer — Treasurer; Miss Peterson — Class Advisor; Nancy Belding — Vice-President; and Virginia Weimer — Secretary. Executive Board: Lee Buehler, Tom Madison, Mike Schramm, Lynn Hein, Nancy Gardner, and Judy Thielen.

We entered "We-Go High" in the fall of 1960. Our homecoming float, "Cream 'Em," didn't win any prize, but we thought we gained much experience in making it. Miss Stahl, our class advisor, helped us elect sophomore class officers in the spring. They were George Lockwood, President; Nancy Belding, Vice-President; Virginia Weimer, Secretary; and Bob Mayer, Treasurer. Also that spring, we put on our class party, "Here Comes Summer."

Miss Peterson ushered us through this school year. History repeated itself in that our homecoming float, "Friendly Persuasion," didn't win any prizes, and now some of us are wondering if it was just experience we lacked. We took part in the homecoming activities by planning the bonfire and our decorations for the annual Halloween party were unique. During the winter we held an all school dance, "Gone With the Wind."

INTRODUCTION

Our slate is clean. The record is ours to write, not only with the grades we made, but the friends we choose and the activities in which we participate. These too, will become a part of our permanent record. We are writing this record a page each day. So far, we are more impressed than impressing. As freshmen, our voice is still weak, but it will grow stronger each year.

SENIOR CLASS WILL

We, the class of 1962, in order to form a more perfect school atmosphere, establish order, insure scholastic tranquility, provide for the common defense (against homework!), and secure the blessings of liberty for all underclassmen who wish to avoid our footsteps, do ordain and establish this will.

1. To the school we leave
Our names scribbled for all posterity on our lockers, in our textbooks and on most desks.
2. To the faculty we leave
Our memory which you will undoubtedly try to lose.
3. To the junior boys we leave
The coveted "crown," though they will never use it as much as we did.
4. To the junior girls we leave
The junior boys who will succeed next year in convincing you they are the greatest guys who ever lived.
5. To all underclassmen we leave:
 - Mr. Byrkit, whose basketball predictions are unfailing. (?)
 - The fascinating game of counting all the little holes in Mr. Smith's ceiling.
 - Mr. Severe whose vocabulary lessons include the 500 most-seldom used words in the English language.
 - The 5¢ library, which ought to lower its rates when we leave.
 - Our assembly seats, we've found that paper airplanes really go from that height.
 - Such habits as: chewing bubble gum in Miss Mohoney's class, doing physics homework in Mr. Smith's class, and cheating on tests in all classes.
 - Miss Caliendo and her exotic hair styles.
